

Features: **WebAccess**

Secure Registration	The secure registration page in WebAccess ensures only authorised users can access the system. You can also add an extra level of security where the member has to visit your site to verify his identity before access is allowed.
Personal Details View	Once logged into the system the member can view and check their personal details.
Set Contact Permissions	Members can set their contact permissions without having to waste time on emails and phone calls to your staff. Options are available to set permission for calls, email, send text messages and so on.
Bookings	Your members can book 24 hours a day, 7 days a week with no need to call or email your staff. Bookings can be made for standard items such as courts or personal training as well as more complex class and beauty therapy spa bookings. If you sign up to the LeisurePoint Credit Card service, members can also pay online.
SMS Booking Confirmation	The member can opt to receive an SMS text message confirming their booking and view any associated cancellation policy.
Attendance Tracking	Members can view a table and chart of their monthly attendance to assess progress and decide on new attendance targets.
Live Class Timetable	Create your bookings in LeisurePoint and then publish this to your website for everyone to see. Now there's no need to run separate timetables that get out of sync. Members can view the timetable, see how many spaces are available and make a booking right there and then.
Skinning	WebAccess can be modified to match the look and feel of your existing website so that your members have no idea they are in another piece of software.
